Additional specifications that should be added

The current BOQ would be stronger if it also specified:

Standard Bidding Document for Request for Quotation for Non-Consultancy Services

- All electrical accessories should comply with **IEC** or **BS** standards.
- Copper conductors should be **99.9% pure electrolytic copper**.
- PVC conduits should be **self-extinguishing** and suitable for concealed wiring.
- Solar components should have a **minimum 5-year warranty**, with solar panels having a **25-year performance warranty**.
- All exposed steel components should be **hot-dip galvanized** to resist corrosion.
- Installation should comply with the **Malawi Bureau of Standards (MBS)** and relevant electrical installation regulations.

These minimum specifications would make the BOQ suitable for competitive tendering by ensuring all bidders quote for materials of comparable quality rather than supplying lower-grade alternatives.
